

# Zunic Success Story:

## *Slim and Stunning at any Age*

Featuring  
**Ces Alvero**

Ces Alvero loves to cook for her 2 kids, fixing them calcium-enriched meals whipped up from dairy-rich recipes to facilitate growth and the development of strong bones. And much as she adores cooking for her brood, she also likes to join them for meals and eat together as a family.

However, while her kids continued to enjoy her delicious creations without any problems, she noticed that she was slowly gaining weight around 2007. Friends were also starting to give her those dreaded comments, "*Uy, humalaki ka ah.*" Although meant in jest, they still dealt a significant blow to Ces' self-esteem. This made her more determined to get her slim figure back.

Regular gym workouts were out of the question, as her job meant frequent traveling and a fully-booked schedule. So when December came around, she decided to use the long break to avail of a slimming treatment she had previously seen in ads.

Ces had no second thoughts about its effectivity--after all, it was being offered by a well-known weight loss facility.

So imagine Ces' dismay when, after undergoing 3 months of treatments, she didn't get the results she wanted. Worst of all, after each ineffective treatment, the weight loss facility personnel kept hounding her with new offers. This disappointing experience made her stop attending the center even if she still had treatments left unused. Around this time, she chanced upon **Zunic** in a magazine and decided to visit the Timog branch for a consultation.

"At first, I was really hesitant since **Zunic** was basically new compared to my previous slimming center. But I was amazed when I saw the **high-technology machines** they had and with the very **hospitable and courteous staff**," Ces recounts. "Unlike consultants from other centers who just kept offering one program after another, **Zunic's Dr. Lalaine Ambulo assessed my body first before designing a slimming program based on my goals and needs.** Even my therapist, **Julie**, was very **efficient and accommodating.** My **Zunic** experience wouldn't be complete without them."

Indeed, what impressed Ms. Alvero about **Zunic's** services is exactly what's at the core of Zunic's unique Slimming and Body Sculpting™ Methodology. Building upon the **modern slimming treatments developed by research groups at NASA and the Mayo Clinic**, **Zunic** uses **advanced state-of-the-art equipment** to apply these new technologies, enabling the removal of unwanted fat faster, safer, and with minimum fuss. With all procedures administered and supervised by **Zunic's highly-trained medical staff**, clients are able to shed pounds in the fastest, safest, and most painless possible way, without exercise, dieting, pills, or

surgery, and with visible results in as little as **45 minutes.**

"At first, I didn't believe their claim that instant results were achievable right after your first treatment. But **after my initial visit, I had lost more than a centimeter off my waist. In 2 months, I had lost a total of 10 centimeters! My tummy became flat and the curves were distinct.** I never expected that all the people I'd meet now would tell me how great I look!" she laughs. "I gained back my self-confidence and I can now wear all the clothes I want! I'm really glad I discovered **Zunic** and would proudly recommend it to friends and relatives."

Indeed, looking at Ces, no one would ever guess that she's already a mom of two kids. Nowadays, friends are left awestruck and cannot help but compliment her on her stunning figure. To this, there is only one thing she can reply. "Well, what else can I say...**Zunic** is a breakthrough!"

Experience Zunic's treatments and discover how they can work for you.
