

The People Have Spoken:

“Believe it... Zunic delivers!”

There is no better way to celebrate Zunic's 2nd year anniversary than to take a look at the people whose lives are forever changed by the latest advances in medical technology that Zunic employs to help you lose weight and actually shape your body without exercise, dieting, pills, injections, or painful surgery.

A lady who couldn't believe the quickness of the results shares, “After a 45 minute treatment on my abs, I saw that my waist line has decreased enough for me to wear my favorite pair of pants, which I took out from my storage box. I have now taken out most of my lovely clothes and am enjoying wearing them again.”

A male client who is himself a medical practitioner, couldn't get rid of the stubborn fat around his stomach. “I used to exercise a lot to flatten my abs but to no avail...until I found Zunic. After undergoing the initial treatment, I noticed a remarkable change in my abdomen. I also developed hypertrophy of the biceps, triceps, and abdominal muscles. Try Zunic now and you'll be amazed!”

Extra weight gained during a pregnancy can be very difficult to lose. One customer who just had her second baby remarks, “I tried going to the gym and trying whatever diet routine there is, but my tummy remained to be an eyesore!” Luckily, she discovered Zunic and after a series of personalized treatments, she emerged with a slimmer, shapelier body. “Aside from the pounds I lost, my tummy amazingly lost inches and I gained the curves in the right places. A beach babe...with her babies!”

Building upon the slimming treatments developed in the last century, research groups at NASA and the Mayo Clinic have

discovered medical applications that led to new technologies that Zunic today utilizes to remove unwanted fat faster and safer—without exercise, dieting, pills, injections, or painful surgery. And more importantly, visible (and measurable) results are delivered in as little as 45 minutes.

Zunic's pain-free weight loss lets you enjoy the benefits of a slimmer body almost immediately. Clients have not only experienced a healthier, more active lifestyle, but their over-all approach in life has become more optimistic. A client recalls the changes that have happened to her since her Zunic treatments, “I've felt so much better since I've been with Zunic. Many friends and family members have told me that I just don't look better physically, but my personality has also improved. My self-confidence and self-esteem have gone up immensely!”

With the opening of its third branch at the ground floor of Vivere Hotel in Alabang City, Zunic introduces another first in the Philippines: éMezzo™ Therapy, the pain-free, needle-free, risk-free mesotherapy. What would normally take 40 painful injections now happens quicker with zero recovery time only at Zunic. It won't be long before new and regular clients alike will be raving about this latest breakthrough that Zunic once again pioneered in the country.

So what's your Zunic story? Be one of the growing number of people who have discovered their Zunic curves.

Visit Zunic today at any of their three branches in Alabang, Quezon City and Makati for a free, confidential consultation. Zunic is open from 8 am to 8 pm, Monday to Sunday.
